01 Abstract

Baby Meme. Big Dream.

Launched in June 2022, Dasbaby is a world-renowned visionary, and Elon Musk is his biggest fan. His biggest dream is to be invited to space, to be a ranger. In addition, what he most wants to do is to protect the peace of the coin circle universe and take care of homeless small animals. Dasbaby changes the world with his dream.

DAS are tokens that support the next tier, controlled and established by the community. It will serve as a decentralized protocol layer for community-led initiatives to move culture toward the metaverse. 03 DAS Baby Coin

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20. Known for 5 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

Doge 1 Minute:

Bep-20/BSC 5 seconds:

Advantages of the Binance smart chain are:

It's a proprietary blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Das Baby is not responsible for the actions of the Binance smart chain network

05 DAS Baby Protocol

Das Baby employs 2 simple functions: Reflection + LP acquisition. In each trade, the transaction is charged a 3% fee, which is split 2 ways.

1%

1% fee = Liquidity tokens are burned and locked. Additionally, 1% of all transaction fees are added to liquidity.

2%

2% fee of which is sold by the contract into BNB, while the other half of the DAS BABY tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.
